Principal Engineer – Commerce · 1440 · Salt Lake City, UT

Chayse McMillan

Principal engineer specializing in Salesforce-based commerce. I architect order, payment, and fulfillment systems for major retail brands, set technical direction across multiple engineering teams, and mentor engineers — with a focus on scalability, reliability, and integrations that hold up at volume.

EXPERIENCE

1440
1440.io · Park City, UT — Jul 2021 – Present

Principal Engineer – Commerce Current — Jan 2025 – Present

- Architect critical commerce systems and drive engineering strategy across multiple teams.
- Lead complex commerce integrations for large retail brands, from discovery through production.
- Shape technical direction with a focus on scalability and reliability.
- Mentor engineers and lead code review standards.

Software Engineer — Jul 2021 – Jan 2025

- Built and maintained integrations between Salesforce and Shopify, Amazon, eBay, Magento, and SFCC for enterprise retail clients.
- Integrated shipping (Shippo, ShipJunction, Desktop Shipper) and payments (Stripe, PayPal) into Salesforce OMS flows.
- Contributed to executive-level software architecture decisions and served as development team lead.
- Created internal tooling that automated company processes and streamlined product support.

Apex · LWC · Visualforce · SOQL · Flow · Salesforce OMS · OCI

DAKCS Software Systems
dakcs.com · Ogden, UT — Feb 2019 – Jan 2021

Software Developer

- Maintained and enhanced core platform services, cloud-based Java applications, and AWS-hosted infrastructure.
- Developed middleware components and integrations for data transfer and API communication.
- Built CRUD and reporting operations with DSXQI, a MySQL-like query interface.
- Helped modernize legacy systems and improve developer tooling across BASIC, C++, C#, Python, Bash, and Java.

Java · AWS · Python · C# · C++ · Bash · MySQL
